

The Morning After Guest House

Carol Cometto, Dr. Bowers' partner of 5 years, has opened a beautiful new guest house for Dr. Bowers' patients. The house is located in a quiet neighborhood in Trinidad, and has been lovingly restored and furnished with the goal of providing a restful and healing atmosphere. There are currently two separate apartments with a total of three bedrooms (5 by Spring 2009!) that are described below. Each apartment has a fully stocked kitchen, beautiful living room, and dining room. Please keep in mind that this is a private apartment complex. The units have been decorated with Carol, Marci and Robin's loving details. There are personal photos, artwork, personal trinkets and other items that belong to us but are there to make you feel comfortable. Please respect Morning After so that it may remain a joyful place for many years to come.

While patients have had a six day hospital stay in the past, you can now enjoy leaving the hospital two days early to rest and relax in a comfortable and home-like atmosphere. (Of course, if for some reason Dr. Bowers is not comfortable discharging you to the guest house, you will continue your hospital stay). A partner or guest may stay with you in the house, pending available space, for a small fee. You may also choose to stay before surgery, or continue your stay (again, pending availability), for fees similar to other lodging available in town.
